INDRAJITSINH RATHOD

Engineering Manager | Founding Engineer | Fullstack & Software Architecture | Generative AI

+91 9601280572 | indra.r.999@gmail.com | Ahmedabad, Gujarat, India | linkedin.com/in/rathod-indrajitsinh

Core Technologies: Node.js, Python, React, AWS, Databases (Relational and Non Relational)

PROFESSIONAL SUMMARY

Engineering Manager and Hands-on Founding Engineer with 14+ years of experience building and scaling B2B SaaS platforms and distributed systems. Hands-on technical leader with expertise in software architecture, cloud systems, and full-stack engineering. Experienced in leading engineering teams, taking products from 0→1, and applying GenAI and agentic AI to solve real business problems.

SKILLS

Engineering Leadership: Engineering Management, Technical Leadership, Team Building & Mentoring, Product Strategy, Technical Road mapping, SDLC, Agile/Scrum
Architecture & Design: System Architecture, Distributed Systems, Microservices, Domain-Driven Design (DDD), Event-Driven Architecture, Multi-Tenant SaaS, BIAN Architecture (Conceptual)
Languages & Frameworks: Node.js, Python, React.js, RESTful APIs, Express.js
Cloud & Infrastructure: AWS, IBM Blue Cloud, ECS/Fargate, Lambda, S3, RDS/Aurora, DynamoDB, Cognito, API Gateway, CloudFront, Kubernetes, Docker, CI/CD
Data & Databases: DynamoDB, MySQL/Aurora, NoSQL, RDBMS, Data Pipelines, Analytics, OpenSearch, Redis
AI & GenAI: Generative AI, LLM Applications, AI Agents, RAG, Amazon Bedrock, LangChain, Claude Code
Reliability & Engineering: Observability, CloudWatch, Grafana, Performance Optimization, Troubleshooting & Debugging, Test Automation
Security & Compliance: Application Security, Multi-Tenant Security, SOC 2, ISO 27001, GDPR

KEY ACHIEVEMENTS

- Architected and launched a multi-tenant B2B SaaS PRM platform from 0 to 1, scaling to support complex partner ecosystems for global software providers.
- Reduced system latency and improved scalability by implementing an event-driven microservices architecture.
- Designed an AI assistant that enables users to ask business questions in natural language and receive actionable insights from business data.
- Integrated AI-powered lead scoring and partner recommendation engines using LLMs and RAG, increasing partner engagement by **30%**.
- Collaborated with a cross-functional engineering team at IBM to enhance the X-Force Exchange platform, processing millions of security indicators with **99.9% uptime**.
- Spearheaded the integration of 3rd party logistics APIs (Easypost, Aftership) for Orderhive, resulting in a **25%** increase in automation efficiency for e-commerce clients.
- Managed and mentored a team of **15+ engineers** through code reviews, technical POCs, and career development frameworks, fostering a culture of high performance and engineering excellence.
- Developed an automation engine to automate the workflows in the product.

EXPERIENCE

Engineering Manager (Software Architect) — Coachbar (AppVentory) **April 2023 – Sept 2026**
Ahmedabad, India

- **Lead engineering for a B2B SaaS platform**, owning technical strategy, architecture, engineering execution, and delivery across product and platform initiatives.
- **Manage and mentor 15+ engineers**, providing technical guidance, regular feedback, performance reviews, and career development.
- Design and evolve scalable, multi-tenant SaaS architectures on AWS focusing on performance, reliability, and cost-efficiency.
- **Built and Led adoption of GenAI** and agentic technologies (Amazon Bedrock, RAG) to enhance lead scoring and partner trust capabilities using **python langchain** framework.
- Partner with Product and Business teams to translate complex requirements into technical roadmaps and engineering priorities.
- Own the end-to-end SDLC, including architecture reviews, CI/CD implementation, and production observability.
- As a **Founding Engineer, built and established** the initial technical foundation, **technology stack (Node, React, Python, AWS)**, and engineering practices that enabled the platform to evolve into a scalable B2B SaaS product.

Senior Fullstack Developer — IBM India
November 2021 – March 2023

Ahmedabad, India

- Worked on **Cloud-based threat intelligence platform (IBM XFE)** providing security professionals with access to threat intelligence, research, and security data.
- Engineered RESTful APIs and backend services using Node.js and Python to process indicators of compromise and malware data.
- Built responsive, data-driven React.js interfaces for security professionals to analyze threat intelligence.
- Deployed and maintained high-availability services on IBM Cloud, ensuring secure data workflows.

Team Lead — OpenXcell Technolabs Pvt. Ltd.
May 2015 – November 2021

Ahmedabad, India

- Led the development of Orderhive (acquired by Cin7), a multi-channel inventory management system.
- Built the core application structure and integrated 3rd party APIs for shipping and tracking (Easypost, Aftership).
- Built and managed the shipment and automation modules, utilizing AWS for serverless scalability.
- Led and mentored a cross-functional team of **7 professionals** to deliver the project goals.

Software Developer (PHP) — Inheritx Solutions Pvt. Ltd.
February 2014 – May 2015

Ahmedabad, India

- Developed custom e-commerce solutions and affiliate marketing platforms using PHP and MySQL.

Software Developer (PHP) — Aarin Technologies Pvt. Ltd.
May 2012 – February 2014

Ahmedabad, India

- Built web applications using Core PHP and Yii framework for coupon management and seminar booking systems.

EDUCATION

Bachelor of Engineering in Information Technology — Dharamsinh Desai University
2008 – 2012

Nadiad, India

Graduated with 68.1% marks.

RECENT PROJECT

AppVentory Channels

- **B2B SaaS Partner Relationship Management (PRM) platform** enabling software companies to manage partners, referrals, deals, affiliate programs, and partner-driven revenue.
- Joined as the **Founding Engineer**, establishing the initial architecture, technology stack, engineering practices, and technical foundation of the platform.
- Built and integrated **AI-powered capabilities** using LLMs, RAG, and agentic workflows.
- Scaled the engineering department from **1 to 30 engineers**, establishing robust hiring pipelines and team structures.
